

SPIRIT OF TRADITION

apirswitches.com

OUR STRENGTHS

SPIRIT OF TRADITION

A product which contains a strong appeal to the past but with contemporary technology.

Each switch plate is unique and hand-made, thanks to the experience of our craftsmen who have worked with metals for over 100 years.

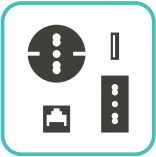

CUSTOMISATION

Each switch plate can vary in shape and cut. It can be engraved with a logo or the description of the purpose of the lever. You can choose the lever which best fits your environments. Widen the choice of colour and metallic finishings.

On our website www.apirswitches.com you can choose your personalization and receive an offer.

RANGE

Our family of switch plates is complete and ready to meet any need.

All levers are available in black and white for a perfect union of aesthetics and technology.

SOFTWARE COMPATIBILITY

Our products are compatible with domotics management software.

BOXES COMPATIBILITY

In case of renovation installing Apir switch plates is possible maintaining the current switch box.

PRODUCT CODE

It is an alphanumeric code which identifies every single plate in compliance with the electric project. This code is also present on the product and on the packs.

It is useful for achieving utmost traceability also for reorders. Useful for positioning at the moment of installation.

WHAT AN ELECTRIC PROJECT FORESEES

A useful tool to understand the necessary quantity of plates and their positioning.

A service that Apir is able to provide, which makes the experience of usage of a room, both in a Hotel and at a private house, simpler.

Every single plate can be personalized with logos and writings.

Collection

4.0

EVERYTHING CAN BE PERSONALISED

Shape, colour, size, cut, fixing, levers.

The Collection 4.0 has been thought out to have the utmost freedom to personalise everything you desire. In 4-mm thick brass, it allows fixing both with exposed screws and with concealed magnets. The finishing on its surface can be chosen among metals or paints from the RAL. Personalisable engravings, from the logo to the icons indicating the destination of use of the toggles.

Just a few examples

Round switch plate
With HDMI outlet

Square switch plate
with a sphere toggle

Round switch plate
with ball end toggle

Hexagonal switch plate
with SHUCO socket

Rectangular switch plate with bypass
socket and HDMI outlet

Baroque switch plate
with double ball end toggles

Collection

2.5

STYLE AND FUNCTIONALITY

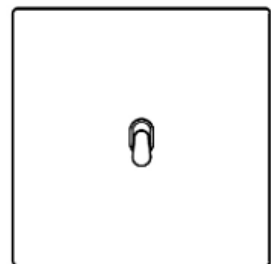

In 2.5-mm thick brass it stands out from the rest of the collection 4.0 because it only presents fixing by means of screws, and it can be realised with square or rectangular shape. The cost is contained.

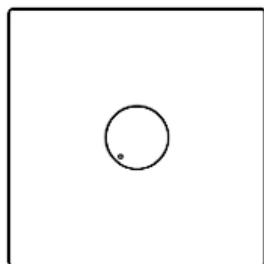

EVERYTHING FOR EVERYONE

The complete collection of plate components available for you
